

TOP SECRET

WORKING PAPER

C in DIPLOMAT
1. Although the preamble to this paper stresses that "psychological operations can only contribute to the success of diplomatic, political, military and economic actions taken by the United States," nowhere in the paper are any such acts specifically suggested.

2. It would seem that if propaganda is a subordinate function in the plan, the actions which it is intended to enhance should certainly be fully delineated. And yet the only thing which has clear delineation in the plan are propaganda themes.

3. If the paper is intended simply to set up a permanent committee which will later spell out these actions, then I think we should vote for it. But, if by voting for it, we are accepting it as policy guidance, then it is entirely too vague.
